

A revolutionary cloud-based room scheduling and analytics solution

Schedule meetings and optimise your workspace easily

ProSpace Meeting Room Scheduling System

Organise and book your meeting rooms and office spaces with ProSpace's cloud-based room booking system. With real-time display, on-the-spot bookings and a secure dashboard, you can now maximise your workspace, reduce time spent on coordinating meetings and increase productivity.

Key Features & Benefits

One Central, Cloud-Based SaaS Solution

Manage all your meetings from one central, cloud-based system that's easy to setup and cost effective. Access key meeting information and check meeting room availability instantly on a single dashboard. You can even filter out an available room based on time, capacity and the kind of equipment you need.

Real-Time Alerts and Updates

Stay up to date when a meeting has been changed. All attendees will be notified if there are any changes to the meeting's time, date or location or when a meeting ends early.

Real-Time Data Insights

Access real-time room booking data and user behaviour such as peak hour usage, meeting duration and average attendees. This can help you plan and optimise your workspace and reduce costs.

Seamless Integration With Major Calendars

Manage your bookings directly from major calendars such as Google or Microsoft 365 and get recommendations on available rooms based on user preferences. Our meeting room scheduling system can be seamlessly integrated with these 3rd party calendars.

Painless User Management

Add or remove users anywhere, anytime with different permission settings to manage user access.

Intuitive Room Display

Download our Room Display solution on any touchscreen Android or iOS tablets to get an update on your booking status and schedules, and manage your bookings within a centralised, web-based dashboard. You can also choose to purchase our tablets that come with a lighted indicator to quickly identify occupied rooms from a distance.

Integration with Our Workplace Analytics System

Our meeting room scheduling software will soon provide integration with our Workplace Analytics system to provide more holistic analytics. It will also work to automatically release a room if nobody is in the room after a designated time or if nobody arrives to tap on the “Start” button on the tablet. The booking will be cancelled and the room goes back into the available inventory.

Book Meeting Rooms On the Go

Soon, you will be able to book, amend or cancel meeting room bookings on the go easily and quickly with our Android and iOS mobile applications. You will also be able to do more with our feature-rich app, such as viewing all your upcoming events at a glance.

Simplify Your Meetings Today!

A smooth and easy to use digital room scheduling system is key if you’re looking to improve work processes, maximise resources and reduce non-productive time and costs.

ProSpace’s cost-effective meeting room scheduling software provides a simple, all-in-one solution to your meeting room challenges, helping you manage a large number of meeting rooms even in different locations.

We can also configure the software to your business needs and enable seamless communication between your employees, vendors and visitors.

Why not experience it yourself? Contact us for a non-obligated product demo and start optimising your workspace today!
